

Antivirus Software

To download the Free Sophos Antivirus software go to the following web address

www.sophos.com/en-us/

Click on register at the top of the page and register for a MySophos account with your student email address. Follow the instructions on screen, you will be sent an email to complete the registration process.

Log in to the new account. Select Add product license credentials and enter the following

In the username box - em106509

In the Password Box - fig4gap

This will add a product to your account called E2EPTSC.

Place the cursor over the Support tab and select Downloads and Updates from the drop down menu.

In the lower half of the screen under the heading Endpoint Security and Data Protection downloads there is a list of Ant-virus software for different operating systems . Select the one for your computer (i.e. Anti-Virus and firewall for Windows)

Now click on the download box for the Anti-Virus software
(Windows users click to download Anti-Virus only NOT with the Client Firewall).

Confirm that you want to save the file in the dialogue box that now opens and the file will be copied to your download folder. Download the Standalone startup guide.

The start up guide gives instructions on how to install the software follow these to install the software on your computer.
