

## Module Surveys

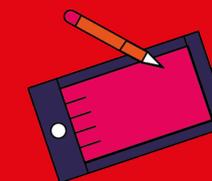

Module evaluation is central to curriculum enhancement and an important indicator of student satisfaction. The survey gathers your feedback on modules each term. You can complete the survey by accessing either:

- A link received by email from [hosting@evasys.co.uk](mailto:hosting@evasys.co.uk)
- Accessing the survey through the MDXapp
- Using the embedded link on the homepage of MyLearning
- Using the Student Survey Portal

Please note, the survey is anonymous.

Available each term

## MDX Surveys

Conducted by MDX, this is your opportunity to reflect on the learning and teaching experience on your programme. By having your say, together we can continue to shape and improve your student experience.

The survey is completely confidential and results are anonymised. It's quick and easy to complete. Results and actions will be shared via the Programme space in MyLearning and will be discussed via Programme Voice Groups.

## NSS

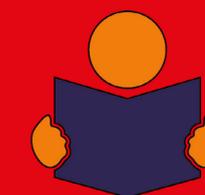

Are you a final year student? Got an opinion about MDX? We want to hear it. The annual National Student Survey (NSS) is organised for final-year, undergraduate students between January to April, and is completely anonymous.

MDX is committed to providing the best experience for everyone, so providing feedback is important for us to be able to improve. We encourage you to let us know if there is any cause for concern.

The results highlight what we're doing right at Middlesex, as well as identifying the areas where you think we could improve.

## PTES/PRES

These Postgraduate surveys give you the opportunity to provide valuable feedback that can lead to enhancements in your learning, teaching and research/taught experience.

Eligible students receive automated personalised notifications to complete the survey.

In previous years, students' feedback has led to improvements including:

- Introduction of MDXapp, including the creation of the 'PGR Community tile'
- Expansion of the Researcher Development Programme. Additional sessions introduced to respond to training needs of research students
- Student-led networking events to promote cross-discipline networking and supporting students to extend and improve the PGR community
